

## Airplane I Dos

Perched high above British Columbia's Sunshine Coast lies Alpine Lake. Soar overhead glacier topped mountain ranges to land at a turquoise lake surrounded by towering fir and cypress trees for an elopement that is out of this world. This bride is proof that a forest ceremony can still feel elevated. A gown designed by Graces Loves Lace features oversized stencil rose embroidery complemented with an under-layer of geometric lace to create a sense of texture and pattern. Her look is finished with bohemian-inspired accessories tying into the free-spirited setting.

### ECO-FRIENDLY AFFAIR

Embrace the adventurous landscape of your destination by fusing environmentally friendly elements into the day. From the carbon neutral flight to stationery made of seed paper that can be planted to grow wildflowers long after your nuptials, planning a sustainable celebration doesn't have to be difficult. An arrangement of cream, blush, and bright pink florals with leafy greens designed by Coastal Florals were grown and foraged from flower farms in British Columbia.
